Geek magazine

Striking images, in-depth articles

Geek magazine

binary name: GeekMagazine.pdf
delivery method: GitHub

Write a geek news magazine, in a journalistic style.
This magazine must be publishable and addressed to all EPITECH students.
The magazine layout should be clear, and your articles should be interesting and lively.

Journalistic style is essential: articles must be titled and signed. Likewise, a journalist's ethics must be observed (no invention, responsibility for what is broadcast).

Your magazine must be at least 5 pages long and must include at least the following articles (8 articles and 3 photos minimum):

1. an editorial on recent world news, which makes you react;
2. a brief about the object you care about the most (photo required);
3. a brief about your favorite place in the school (EPITECH) (photo required);
4. an article about the best and the worst experience you have had this year;
5. your 3 survival tips for Tech1 students ;
6. an interview with a Tech4 student currently abroad or Tech5 (photo required);

7.a report on an event that you have organized or attended (event organized at school or outside): festival, competition, concert, match, video game show or car show or other, LAN Party , role play, voluntary action, ...;

8. the recipe for the dish you prefer, cooked your way for your evenings with friends.

Illustrate as many articles as possible by taking as many photos yourself as possible and indicate in the caption who is the author. When the illustration is not yours, ensure the reproduction rights and indicate the source of the image.
