

# SURVIVOR POOL

WILL YOU BE ABLE TO DELIVER??

# SURVIVOR POOL

We are excited to introduce a new project in collaboration with a very talented businessman, Jean-Eudes Berlier, with a strong commitment to excellence and a track record of success. Mr Berlier chose our school to develop his brand new concept, and this is quite an opportunity for you all!

The project represents a dynamic and innovative undertaking that aims to revolutionise communication and team efficiency in business units.

The idea seems pretty simple at first sight, but must be highly qualitative to be complete and improve later on.

To make it simple, you must **built a React-native portal mobile app with a employees photo gallery and customizable widgets.**

This app is intended to be used as a white label by employees, so it must include authentication and design customization.

You will get very quickly more details about it, but considering the short delay, feel free to start as soon as possible.

Jean-Eudes is a very demanding person, so to avoid misunderstanding and time-wasting, you will be given, as fast as possible, raw material he sends us.

We must warn you that he is sometimes a bit fickle which we may have to handle...

Please do not mind the possible inappropriate tone of his communication, he is a straight-to-the-point kind of man.

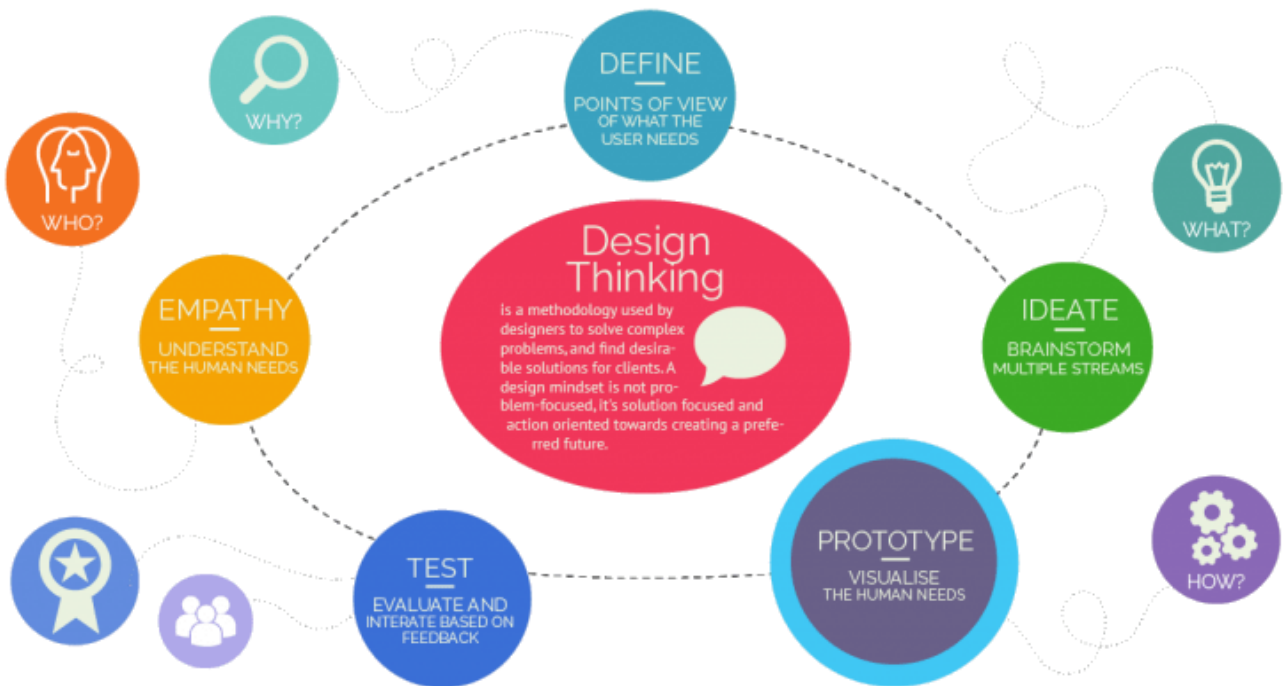

Meeting our client needs must be your priority!

Regarding widgets, feel free to implement the ones you reckon useful and flashy enough for a demo version, such as:

- ✓ email preview
- ✓ weather forecast
- ✓ chat
- ✓ file explorer
- ✓ any kind gamification
- ✓ ...

Please be aware that the app you will deliver is a prototype, aiming to find fundings. It must be impeccable, fully convincing and meet high-quality standards, technically as well as in its conception, design, UI and UX.

In embarking on this exciting venture, we are confident that you will not only meet but exceed expectations through innovation, expertise, and a shared commitment to excellence. We hope this project will stand as a testament to the capabilities of Epitech by demonstrating the value of our school.
